

# Personal Online Data Services

**SAFE – SIMPLE - SECURE**

### Unlimited Number of Computers

Backup as many computers as you like using a single account. Over 60% of households having more than one computer and Computer BYTES allows you to back up and recover from all of your machines. Backup your home, office and laptop computers all on one account for easy access to ALL your files from anywhere.

### Intelligent File Filters

Tell Computer BYTES Online Backup to watch your My Documents folder but to ignore all \*.mp3's and \*.avi's. Alternatively tell Computer BYTES Online Data Service to only protect \*.doc, and \*.xls. Either use our pre-sets or set your own inclusion/exclusion mask.

### Global Roaming Access to Your Files

Because your data is being backed up daily to the Computer BYTES Backup Server Grid - you can access your data anywhere in the world using just a web-browser. Never be without that critical file again.

### One-Click File & Folder Sharing

From inside the Online Recovery Interface you can share your files with anyone with an email address. Never have a large attachment bounce again. Just share your already backed-up data with your friends and colleagues. Or if you are a home user – simply share photos or videos.

*Never lose those precious pictures of your family and friends again!*

*“Simply add all your photos, documents, quicken data even music to you backup and rest easy. If you ever have a computer problem, virus infection, even if someone steals your computer, you know that you still have your precious pictures and memories safely tucked away.”*

*-Ken Knighton, CEO*
